Features at a glance

The hydrolysis resistant BEHAbelt conveyor belts and flat belts are mainly developed for the food industry with direct food contact.

BEHAbelt food line benefits:

- FDA/EC/BfR-conformity
- Especially high durability in wash-down areas (e.g. with frequently cleaning)
- Brilliant blue colouring (signal colour, as a non-natural colouring)
- Very good hydrolysis resistance and stability against formation of microbes
- Very good weldability
- Very good mechanical characteristics
- Great portfolio of reinforced and unreinforced round belts, V-belts, special profiles and flat belts available

Overview of standard qualities for the food industry:

- PU 70 A (approx. 76° Shore A) transparent
- PU 75 A (approx. 80° Shore A) sky blue
- PU 80 A (approx. 84° Shore A) ultramarine blue/ transparent/ orange
- PU 85 A (approx. 88° Shore A) sapphire blue

Other qualities and colours available on request.
