84° Shore A

BEHA Innovation GmbH is a company that develops and produces high-quality urethane belts for various applications. The PU80A belt is a popular choice for many industries due to its durability and flexibility. The 8,5x37 specification indicates the belt's width and height. The 84° Shore A hardness is a measure of the belt's resistance to indentation. The table provides detailed information about the belt's dimensions, weight, and length. The 30m length is the standard length, while the 100m length is available for larger orders. The 60mm width is the standard width, while the +2.4mm width is available for custom orders.
